

LAND SURVEYING

LAND SURVEYING EXPERIENCE

D. A. Brown Engineering Consultants (DABEC) has an incredible staff of Land Surveyors, Field Crew Chiefs, and Field Technicians with a wide variety of experience.

Topographical Surveys

Utilizing state-of-the-art equipment, including ATVs to rapidly access sites, we can provide topographical surveys of potential development properties in very short order. Real Time Kinematic GPS equipment coupled with our experienced personnel allows for very accurate surface modeling to be completed.

ALTA/ACSM Boundary Surveys

We have completed extremely complicated ALTA/ACSM surveys in record time to meet our clients' requirements for closing. Project experience includes sites valued from under \$1M to over \$500M.

Field crew staking with robotic station and Ranger ATV

Typical construction staking site with Ranger ATV

GPS Control Networks

Our control network experience includes projects as small as individual site control for contractor use (machine control software) to sites as large as entire counties for aerial and GIS control networks.

Construction Staking

Our construction Staking experience includes site development staking, road projects, building structural, machine line, crane rail, and just about anything a contractor or builder would like to have a stake for. We have established locations for improvements 35' above the ground and even worked 30' below grade.
